## INTRODUCTION

Final figures from the 1971 Census are presented in this report to show numerical and percentage distributions of the population into three broad groups of mother tongues — English, French and all other. Data are shown for census divisions and subdivisions (i.e., counties, regional districts, rural municipalities, incorporated cities, towns, villages, etc.) and for federal electoral districts.

This report updates figures from a comparable report of the 1961 Census (Catalogue No. 92-529). Its main function, as in the case of the earlier report, is to provide data to meet the terms of the Official Languages Act of July 1969, which provides for the establishment of Bilingual Districts in Canada, using mother tongue figures as determined at each census as the basis for their delineation. These data are designed specifically to assist the Bilingual Districts Advisory Board in making recommendations for the establishment of such districts. To that end, it designates those subdivisions and electoral districts where the minority language group was 10% or more of the total population of the area in 1971. For this purpose, the minority group in all municipalities of the Province of Quebec is considered to be the group with English mother tongue. In other provinces, those with French mother tongue are considered to be the minority language group.

For census purposes, the concept of "mother tongue" is defined as the language which a person first learned and still understands. For infants, the language commonly spoken in the home is taken as the mother tongue.

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Les chiffres définitifs du recensement de 1971 présentés ici indiquent la répartition absolue et en pourcentage de la population en trois grands groupes de langue maternelle: anglais, français et autres. Les chiffres sont donnés par division et subdivision de recensement (c.-à-d. comté, district régional, municipalité rurale, cité, ville et village constitués, etc.) et par circonscription électorale fédérale.

Ce bulletin met à jour les chiffres d'un bulletin comparable du recensement de 1961 (n° 92-529 au catalogue). Son but principal, comme dans le cas du précédent, est de fournir les données requises pour répondre aux exigences de la Loi de juillet 1969 sur les langues officielles, qui prévoit la création de districts bilingues au Canada à la lumière des chiffres du recensement concernant la langue maternelle. Ces données ont pour objet exprès d'aider le Conseil consultatif des districts bilingues à formuler ses recommandations relatives à la création de districts bilingues. À cette fin, il désigne les subdivisions et les circonscriptions électorales où le groupe linguistique minoritaire représente 10% ou plus de la population en 1971. À cette fin, le groupe minoritaire dans toutes les municipalités de la province de Québec est considéré comme celui dont la langue maternelle est l'anglais. Dans les autres provinces, les personnes dont la langue maternelle est le français sont considérées comme étant le groupe linguistique minoritaire.

Aux fins du recensement, la "langue maternelle" est la première langue apprise et encore comprise. Dans le cas des enfants en bas âge, la langue ordinairement parlée à la maison est considérée comme la langue maternelle.

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recouplements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

### SYMBOLS

- nil
- amount too small to be expressed
- \* designates municipalities with a mother tongue minority of 10% or more (see above).

### SIGNES CONVENTIONNELS

- néant
- nombre infime
- \* indique les municipalités où la langue en minorité était de 10 % ou plus (voir ci-dessus).
